ReactJS

- what, History
- why ReactJS?
  - component based system
  - unidirectional flow
  - JSX
  - Virtual DOM
  - SPA
  - Babel
  - component, state, props
    - returns JSX
    - data container
   - forms ReactJS libraries
    - Inverse data flow
    - Hooks
      - Hook into React features in function based components
    - Lifecycle component methods
    - useEffect

props → inverse data flow
